**Graft in Russia**

A Country Where the Graft Works in Daylight

Graft in Russia is on such a naive's vast scale that it becomes grotesque. The man who had the idea of foreign shipbuilding concern told me of a battlehip which he personally witnessed at Vladivostok in 1905. The plans were accepted, the steel contracted for, and the work never started at Odessa, and in the course of time it was reported that the hull had been completed.

The Governor of the Province personally broke a champagne bottle over his desk to celebrate the launching of sea on her trial trip. Then news came that the battleship had sunk somewhere in the Pacific. The cause was suspicious—and an investigation was ordered; and it was learned that the graft had never been built at all.

At another serious epoch of the Russian retreat last summer, when whole divisions were annihilated by cavalry, the Governor of the Province, their cannon, I met an Englishman who had come to Russia three months before. He said it was still at Arzhangal—he said he would be buried in the railway station if officially he were buried in the front.—John Reed.

Warm in children's ways, however, the next week the tender linings of the intestines and, if left to pursue their ravages undisturbed, will ultimately bring about the death of the host. These worms are of the hook variety and cling to and feed upon interior surfaces of the intestinal walls, not only exterminating these worms, of whatever variety, but will serve to re-pair the damage.

To the average Scottish churchgoer the minister who reads his sermon is a weak soul or preacher. In a Hail Mary the reader was always offended in this respect. At last a deputation of his congregation would prevail upon him that he would prefer him to preach without reading every word from a manuscript.<sup>23</sup> I must apologize, but I have a bad memory, so I did not in writing say "Well, meister," was the German's clothes take fire, wrap him in a coat of blanket. Fires and explosions of gassine are usually the result of giving off gasoline vapors should never be brought into the same room as anything giving off sparks, where matches are easily to be lit.

The odor of gasoline in any room is a warning to the user that war correspondents received orders not to mention what had been done.

**More Shell Orders for Canada**

Additional shell orders have come to Canada as a result of financial credit given by the Canadian Bankers' Association, and further orders on similar lines are now in prospect, made by the Bankers' Association total \$76,000,000, final payment having been made in January. Orders were arranged last winter by Sir Thomas White and on the strength of these were arranged by the War Office through the Imperial Munitions Board.

All these have been arranged willingly and generously. And the contracts were signed before the financial difficulties going after their initial undertakings had been executed.

It is not to be expected that it will be confirmed and the maintenance of the munitions industry seems assured.

A boy of tender years was returning from school, crying bitterly. "What sits you, my little fellow?" asked an old gentleman.

"I am very sorry, the teacher gave me for the best boy in the class!" sobbed the boy.

"I am very sorry, said the old gentleman. "Here is another one that will take its place. But tell me, how did you come to lose it?"

"Cause I wasn't the best boy in the class!" sobbed the boy.

They are having trouble in a certain New England church because some members are saying that "a church member should not be allowed to—please the parsons—and as the practice of sinners to sin—in the name of God, is a sin."

**Old Father Thame as Physician**

Dr. Caselli's Instant Relief is taking in hand with commendable energy, the provision of means for the relief of those who travel dross toward convalescence. Last year the River Thames was used for giving relief to the sick, and this year has been arranged to give trips to 12,000 invalids daily, every available boat on the river, from Rotherhithe, where as many as are able to do so, are engaged in the charge of the park, and there staying with light refreshments.

Local and city committees are organized, with medical skill, to ensure that the trips will be useful aids to the sick and infirm. Money has literally flowed into this fund for the purpose.

**Minard's Liniment Cures Distemper.**

Colonel Culpeper, of Virginia, was a thoroughly democratic body when making his tour of the state in his natural state. He was known to foregather with strangers and in their company, and to sit down and talk with the flowing bowl. One morning after such a joyous occasion he was taken ill, and the doctor called him at the parlor door, the slightest attention. "I have got to go to bed," said the colonel, "and why, colonel, surely you recall that I was out with all you half night?"

"Yes, sir, I do, and I am afraid you are coloed. Am I obliged to recognize every fool who goes on a spree with me?"

Little Euclid was attending her first class in domestic science, and was asked to tell briefly the surest way to keep out of souring. And Euclid gave an answer that put the professor to shame: "Leave it in the cow."

**Overcoming Egg Breakage Simple Device That Prevents Breakage of Eggs in Crates**

A commercial poultry farm, which secured a light motor truck for hauling eggs and poultry from the farms of the neighborhood, had a great deal of trouble with the breaking of eggs in the bouncing of the springs of the truck, which jolted the crates several as high as two dozen to a crate, and was done was done had any effect in reducing it.

The trouble was overcome by the top layer, showing that it was due to this layer being bounced up against the bottom, and the crates, which were across the top, did not give enough protection.

The trouble was overcome by the heavy newspaper across the top, and the lid on, using sufficient newspaper to fill the top of the truck.

This formed a sort of mat, which was not hard enough to break the egg shells, but strong enough to hold up the space so that the crates did not move. Breakage did not average an egg to a crate now.

Such a simple device, as such as used in the bottoms of most egg cases, are very good for placing on top of the crates, but the eggs shipped long distances are always packed in this manner, and those only are selected who are strong enough to stand when another crate is roughly thrown on top.

In speaking of rough handling, it might be said that a good deal of it is caused by the expressman's receiver.

The shipper has been careless in letting a few points stick out. Who can tell?

**Training a Grenadier**

Present War Has Brought Back the Close Range Fighter

With a cannon firing shells weighing ton a distance of 22 miles, there was little thought that in a modern war there could be close combat at a distance of from 22 feet to 22 yards. But this present war, as is well known, has brought back the close range fighter in the form of the grenadier, who is the most effective soldier in our House of Commons. His proceedings are often lively, and his power is great. But the difference between the House of Commons and our House of Commons must be understood. The system of government in Russia. The Duma has no power, but the Emperor has all. Ministers are very seldom drawn from the ranks of the army, and it is the right of the Emperor to appoint them and to render to it an account of their stewardship. They are responsible to the Emperor.

The Emperor appoints them and discards them, and the Emperor can open, close, or postpone the sessions of the House, and those in office are responsible to the Emperor.

It is a mystery where Mr. F. McDougall's forty dollar prize chickens have gone to. If they are visiting with friends in the district of Mr. McDougall, he would like to hear of their location.

A severe thunder storm struck the town on Tuesday evening, lasting about two hours. The Alberta hotel was struck by lightning and suffered some fire. Little damage, however, was done as the fire was soon extinguished. At the time of the storm there was one very heavy clap of thunder, and everyone in town for the moment thought they had been struck. No doubt the people who were staying at the Chinese restaurant appears to have sustained the worst of the shock. Even the rocks were all found broken after the excitement.

Several of our soldiers boys had a final "farewell" to Granum on Friday last. Quite a crowd gathered at the station to bid them good-bye, and everyone seemed crestfallen as the boys would soon be in the thick of the fight. Mothers, sisters, wives and girlfriends were all present. Some of our modest young ladies forced the men who were watching them and for a brief moments enjoyed some private bites. But it was bright girls, we only wish that we had been the victims.

Ed. Note—We expected this week to have given the price list of the Granum Fair, but for some reason or other it has not been received at our offices.

The Red Cross ladies have had a very successful month and raised from various sources over \$600.

The boath at the Fair was well patronized and the name quilt, on which they have been working for some time, was literally covered with names. The fair was a great success and the fair and fair to the lot of a young lad, the hill. The climax was reached at 5 o'clock on the last day of the Fair, when an auction sale was held, and goods of every description, which had

been donated to the Red Cross, were sold. The ladies deserve to be congratulated on the success of their efforts.

Mr. J. H. Beatty paid his fine rather than go to the soap. In estimating the cost of his little fishing trip, he can hardly conceive how much he would have to pay for a fishing license the rest of his life—if he didn't live too long. He is a good boy and a good citizen of Granum. He has removed to his homestead near Empress for a six weeks' vacation.
